ID	Title	Latest & Combined
C64	The "For Engineers" page should contain [Get offers] button	
C65	When the users click on the [Get offers] button, they are redirected to the "Create account" page.	

1.1.2.6. Feedback from users (1)

ID	Title	Latest & Combined
C66	The "For Engineers" page should contain at least 10 feedback from real users at the bottom of the page	

1.2. Candidates (0)

1.2.1. [Free sign-up] button (2)

ID	Title	Latest & Combined
C67	When not logged in user hovers over the filters section, the [Free Sign Up] button appears	
C68	When not logged in users click on [Free sign-up] button, they are redirected to "Create an account" page	

1.2.2. [Sign in] button (3)

ID	Title	Latest & Combined

ID	Title	
C69	When not logged in user hover over the filters section the [Sign Up] button is appeared	
C70	When a not logged-in user hovers over the filters section, the [Sign In] button appears	
C71	When not logged in users click on the [Sign-in] button, they are redirected to the "Sign In" page	

1.3. "Sign in" link (1)

ID	Title	Latest & Combined
C72	When not logged in user clicks on the "Sign In" link, they are redirected to the "Sign In" form	

1.3.1. Sign In form (7)

ID	Title	Latest & Combined
C73	The "Sign In" form should contain the "Email" required field	
C74	The "Sign In" form should contain a "Password" required field	
C75	The "Sign In" form should contain "Forgot password" link	
C76	The "Sign In" form should contain [Sign In] button	
C77	The "Sign In" form should contain "Sign Up" link	
C78	The user can sign in to filling all required fields	
C79	The user can sign in with valid credentials	

1.3.1.1. "Email" field (14)

ID	Title	Latest & Combined
C80	The user can sign in by entering in the "Email" field already registered email	
C81	The user can't Sign In without the dot symbol (.) in the "Email" field	
C82	The user can't Sign In without the At symbol (@) in the "Email" field	

C83	When the user enters an invalid email in the "Email" field, the validation message appears
C84	The user can't Sign In without the username before the 'at" symbol in the "Email" field
C85	The user can sign in with the subdomain in the "Email" field
C86	The user can't sign in without the domain in the "Email" field
C87	The user can't Sign in with multiple @ symbols in the "Email" field
C88	The user can't Sign in with empty "Email" field
C89	The user can't Sign In with unsupported symbols in the "Email" field
C90	The user can't sign in with an uppercase letter in the "Email" field
C91	The user can't sign in with a SQL/script injection attempt in the "Email" field
C92	The user can't sign in with long email (64+ characters before @) in the "Email" field
C93	The user can't sign in with long domain (over 254 total characters) in the "Email" field

1.3.1.2. "Password" field (13)

ID	Title	Latest & Combined
C94	The user can sign in by entering in the "Password" field already registered password.	
C95	When the user enters an invalid password in the "Password" field, the validation message is appeared	
C96	The user can't sign in with empty "Password" field	
C97	The user can't sign in by entering the "Password" field to the maximum length (129-character password)	
C98	The user can't sign in by entering only letters in the "Password" field	
C99	The user can't sign in by entering only numbers in the "Password" field	
C100	The user can't sign in by entering only special symbols in the "Password" field	
C101	The user can sign in by entering at least one uppercase letter in the "Password" field	

C102	The user can sign in by entering at least one lowercase letter in the "Password" field	
C103	The user can sign in by entering at least one number in the "Password" field	
C104	The user can sign in by entering at least one special character in the "Password" field	
C105	The user can't sign in by entering SQL/script injection in the "Password" field	
C106	The "Password" field should contain visibility toggle	

1.3.1.3. [Sign in] button (1)

ID	Title	Latest & Combined
C107	When the users enter all valid credentials and click on the [Sign In] button, they are redirected to the profile information page	

1.3.1.4. "Forgot password" link (1)

ID	Title	Latest & Combined
C108	When users click on the "Forgot password " link, they are redirected to the "Forgot password" page	

1.3.1.5. "Sign Up" link (1)

ID	Title	Latest & Combined
C109	When users click on the "Sign up" link, they are redirected to the "Create an account" page	

1.4. "Sign up" link (1)

ID	Title	Latest & Combined
C110	When not logged in users click on "Sign up" link, they are redirected to " Create an account " form	

1.4.1. Create an account form (7)

ID	Title	Latest & Combined

C111	The " Create an account" form should contain the "Email" required field
C112	The " Create an account " form should contain the "Password" required field
C113	The " Create an account" form should contain the "Repeat password" required field
C114	The " Create an account form " form should contain "Sign Up via LinkedIn" link
C115	The " Create an account form " form should contain "Sign Up via Google" link
C116	The " Create an account form " form should contain "Sign Up via GitHub" link
C117	The " Create an account form " form should contain [Create an account] button

1.4.1.1. "Email" field (14)

ID	Title	Latest & Combined
C118	The users can sign up with valid email credentials	
C119	The user can't sign up without the dot symbol (.) in the "Email" field	
C120	The user can't sign up without the At symbol (@) in the "Email" field	
C121	When the user enters an invalid email in the "Email" field, the validation message appears	
C122	The user can't sign up without the username before the 'at" symbol in the "Email" field	
C123	The user can sign up with the subdomain in the "Email" field	
C124	The user can't sign up without the domain in the "Email" field	
C125	The user can't sign up with multiple @ symbols in the "Email" field	
C126	The user can't sign up with an empty "Email" field	
C127	The user can't sign up with unsupported symbols in the "Email" field (#, $, %, ^, *, =, <, >, {}, [], |, \, /)
